

onClientScreenshot

From Mafia2-Online

Description

This event is triggered when the client takes a screenshot.

Parameters

```
(string name, string path)
```

string name	The file name of the screenshot
-------------	---------------------------------

string path	The path of the screenshot
-------------	----------------------------

Example

```
?  
1function onScreenshot(name, path)  
2{  
3    // You can return 0 here to prevent the default screenshot message  
4    return 1;  
5}  
6addEventHandler( "onClientScreenshot", onScreenshot );
```
