mysql query

From Mafia2-Online

Description

>> This function is used to execute a MySQL query.

Parameters

```
(mysql_handler handler, string query)
```
  `mysql_handler handler` The handler of the MySQL connection
  `string query` The query to execute

Example

```
?
1  local handler;
2
3  function scriptInit()
4  {
5      handler = mysql_connect( "localhost", "root", "iLoVeGaBe", "m2db" );
6
7      local query = mysql_query( handler, "SELECT * FROM `users` WHERE `id` = 1" );
8      local result = mysql_fetch_assoc( query );
9
10     log( "Username: " + result.username);
11
12     // Free the results
13     mysql_free_result( query );
14     return 1;
15 }
16 addEventHandler( "onScriptInit", scriptInit );
```
