# onScriptError

From Mafia2-Online

## Description

This event is triggered when the script encounters an error.

## Parameters

```
(int type, int line, int column, string error)
```

| | |
|---|---|
| int type | The type of error |
| int line | The line number of which the error is on |
| int column | The column number of which the error is on |
| string error | The error message |

# Example

```
?
1  function onErrorDetect( type, line, column, error )
2  {
3      log( "Error Detected: Type: " + type + " Line: " + line + " Column: " + Column +  Error: "  +
4  error );
5  }
   addEventHandler( "onScriptError", onErrorDetect );
```
